land acquisition to construction to actual delivery, has an impact on the project. This capital-intensive sector is extremely vulnerable to the economic cycles. Adverse movement in interest rate affects the real estate players in both ways by hampering demand as well as increasing the cost of construction. The sector is also subject to multiple regulatory approvals from respective authorities; thus, the timely receipt of regulatory approval is critical for the timely launches of new project phases and future sales/collections.

Geographical concentration risk

All of the past and ongoing projects of the group is located in Pune, Maharashtra which exposes the company to geographical concentration risk. Any adverse movement in the regional real estate market can impact the overall operations of the company
